# Health

Our priority in health is to decrease health disparities for the underserved by ensuring access to quality care. We aim to support prevention and awareness programs that help people reduce their risk for chronic disease.

We partner with global non-profit organizations to focus on increasing the number of global health care workers in India, South Africa, and Mexico. Our partners help us bring new resources to regions where people lack access, information, and the basic care needed to stay healthy.

# 1,200+

EMPLOYEES  
PARTICIPATED IN  
BOSTON SCIENTIFIC'S  
DISASTER RELIEF  
CAMPAIGNS

Numerous natural disasters greatly impacted our employees in the US, Mexico, and Puerto Rico. In response, **over \$3 million** was donated to the Employee Disaster Relief Fund and disaster relief campaigns throughout 2017.

The Employee Matching Gifts Program was expanded globally this year to support the spirit of caring among employees and increase the positive impact of employee giving in communities around the world.

Our caring value extends to employees in every region across the globe. We are proud of the countless examples of caring for others that take place every year.
